Professional Summary

Software Developer with 3+ years of experience building production web applications, e-commerce platforms, and SaaS products for enterprise clients including Robinsons, Megaworld, Asian Development Bank, and St. Luke's Medical Center. Strong in both frontend (React, Next.js, Vue.js, Angular) and backend (Laravel, Node.js, NestJS, Java/Spring Boot, WordPress) development. Built and deployed full-stack platforms with payment integrations (Stripe, PayMongo), real-time systems (Socket.io, Firebase), REST API design, relational databases (PostgreSQL, MySQL), and CI/CD pipelines. Experienced in agile workflows, code reviews, and cloud deployment on DigitalOcean, Vercel, and Docker environments.

Skills

WEB TECHNOLOGIES & DATABASES	HTML5 · CSS3 · Tailwind CSS · SCSS · Bootstrap · Material UI · jQuery · Django · MySQL · PostgreSQL · REST API · WordPress · Firebase · WooCommerce · SQLite · Express.js · NestJS

CMS & E-COMMERCE	WordPress · WooCommerce · ACF · Custom Plugin Development
TOOLS & DEVOPS	Git · GitHub · GitLab · Bitbucket · Docker · Postman · Jira · DigitalOcean · Vercel · Netlify · Railway · Nginx
CI/CD & TESTING	Bitbucket Pipelines · GitHub Actions · Vitest · Jest · Playwright · PHPUnit

Work Experience

Full Stack Developer

Oct 2025 – Oct 2026

Razza Consulting · Remote

Production e-commerce platform (RideWrap) - WordPress/WooCommerce storefront + Laravel team management system in a Docker monorepo.

- Maintained and enhanced a production e-commerce platform (RideWrap) built on WordPress and Laravel within a monorepo architecture with Docker.
- Developed and integrated REST APIs between WordPress and Laravel using OAuth2 (Passport) for cross-platform communication.
- Built a real-time session tracking and event logging system using Firebase, TypeScript, and Service Workers.
- Developed custom WordPress plugins for service logging, quality checking, and design file management.
- Integrated WooCommerce REST API with Laravel for order processing, shipping, and inventory management.
- Deployed updates to production via SiteGround and Bitbucket Pipelines CI/CD.

Web Developer

Oct 2023 – Oct 2025

DesignBlue Manila Corp · Salcedo Village, Makati City, Philippines

- Developed responsive web interfaces using Tailwind CSS and JavaScript.
- Built web applications using Laravel and Nuxt 3.

- Converted Adobe XD designs into responsive and functional web pages.
- Developed and integrated databases and APIs.
- Managed DigitalOcean deployments and performed debugging, code reviews, and performance improvements.
- Built custom CMS (Content Management System) using Laravel for corporate website, allowing clients to manage pages, content, media, and site settings without developer intervention.

Web Developer May 2022 – Mar 2023

Sun Moon Technology · Remote

- Developed and maintained a corporate website with content management using PHP and MySQL.
- Built responsive front-end interfaces from design mockups using HTML, CSS, and JavaScript.
- Developed backend functionality including contact forms, content pages, and admin features.
- Designed normalized database schemas and implemented optimized SQL queries to improve data retrieval speed and application performance.
- Managed DigitalOcean deployments for secure and reliable hosting.
- Conducted code reviews, debugging, and performance tuning to ensure high-quality deliverables.

Education

Senior High School Jan 2017 – Jan 2019

University of Makati

BS Computer Science - Major in Application Development Jan 2019 – Jan 2023

University of Makati
